

SHASHWAT TIWARI

New Delhi, India | tshashwat568@gmail.com | +91-9667548307 | linkedin.com/in/shashwatttttt | github.com/shashwatttttt

PROFESSIONAL SUMMARY

Full-Stack Software Developer and Application Security Engineer with 2+ years of experience building secure, scalable applications and conducting comprehensive security assessments. Expert in mobile application development, penetration testing, reverse engineering, and full-stack web development.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), Java, Kotlin, C/C++, Bash, SQL

Full-Stack Dev: Android (Kotlin/Java, SDK, ADB), React.js, Vue.js, Angular, Node.js, Express.js, RESTful APIs, Microservices, Responsive Design.

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (EC2, Lambda), Docker, Kubernetes, CI/CD Pipelines, Jenkins, Git, Linux

Security Expertise: Mobile Penetration Testing, OWASP Mobile Top 10, VAPT, Secure Code Review, Web/API/Network Penetration Testing

PROFESSIONAL EXPERIENCE

Application Security Engineer

April 2023 – August 2025

HackersVilla CyberSecurity Pvt Ltd, Delhi, India

- Led a team of 5+ members to design and deliver secure web and mobile applications for clients in fintech, healthcare, and e-commerce, achieving high client satisfaction.
- Built 15+ automation and security tools using Python, Node.js, React, Vue.js, and Android SDK, significantly reducing manual work and improving team efficiency
- Conducted mobile application penetration testing based on OWASP Mobile Top 10 using tools like JADX, Ghidra, Frida, and Objection to find critical security issues
- Performed security testing on web applications, APIs, and networks using Burp Suite, Metasploit, and custom scripts to identify OWASP Top 10 vulnerabilities
- Automated CI/CD security checks were implemented using Jenkins, Python, and Bash for continuous testing and secure deployments
- Trained and mentored students in mobile security, VAPT, and secure coding, contributing to a growing cybersecurity community

Subject Matter Expert

January 2022 – January 2023

upGrad, Remote

- Trained 50+ students and professionals in full-stack development, mobile security, Python, modern JavaScript frameworks, and secure coding practices
- Created practical course content, coding tests, and hands-on projects in web development, mobile security.
- Mentored learners individually for career transition into software engineering and cybersecurity roles, achieving an 85% placement rate

EDUCATION

Bachelor of Technology in Information Technology (Drop-out) 2021 – 2023 University of Delhi
(Coursework completed: Data Structures, Operating Systems, ML/AI)

CERTIFICATIONS

Compita Penter+ | Security Engineer | Jr Penetration Tester

KEY PROJECTS & ACHIEVEMENTS

- Android Red-Team Toolkit:** Developed lightweight red-team toolkit for reconnaissance and attack simulation on Android platforms, demonstrating advanced mobile security capabilities ([GitHub](#))
- HackersVilla Platform:** Built end-to-end cybersecurity e-learning platform using modern web technologies with responsive UI, secure authentication, API integrations, and optimized backend workflows (hackersvilla.xyz)
- Security Automation Suite:** Created custom Python-based tools for automated vulnerability scanning

and security testing, reducing manual testing time by 60%

- Won [2nd place in National CTF competition](#) demonstrating advanced penetration testing and problem-solving skills
- Active member of [NULL Delhi cybersecurity community](#), contributing to knowledge sharing and security research
